Motorization Made Easy!

ADVANCED, INNOVATIVE TECHNOLOGY with SIMPLE PROGRAMMING
PROVEN RELIABILITY with 7 YEAR WARRANTY and FULL COMPLIANCE
UNMATCHED SERVICE, SUPPORT with SAME DAY DISPATCH

Motorization Made Easy!

Who is Alpha Motors

Alpha Tubular Motors produce a very high-quality range of motorization products and accessories for indoor roller blinds, outdoor awnings, shutters and screens. Alpha offers reliable, intuitive motorization solutions with a highly competitive edge. Our focus is on genuine high-quality motorization products at a realistic price. We also boast some of the most elegant and flexible controllers on the market and our programming is super simple.

We are currently the second best-selling motor in Australia amongst the usual array of European offerings and we are the best-selling motor by far in external products. At Alpha we place great importance on doing things the right way. We make a point of being ethical in the way we do business and deal with every situation in a manner designed to keep everybody happy.

There are several reasons why everyone is switching to Alpha Motors:

- ✓ The 7 year warranty
- ✓ The unmatched service
- ✓ The ongoing support
- ✓ The same day dispatch
- ✓ The extremely competitive pricing
- ✓ Proven reliability
- ✓ Advanced technology
- ✓ The easiest programming on the market
- ✓ The best remote control options on the market
- ✓ The preferred motor of many industry giants
- ✓ Our full compliance to American standards

Our customers are happy with the all the advantages Alpha has to offer and we hope to partner with you on future projects, and that we may help you grow your business and profitability. Choose Alpha and experience the difference for yourself.

WSCMJ-AC-2.0

AC drapery motor

WSCMI-DC-2.0

Lithium battery drapery motor and wall mount battery pack

**ALDC
charger required**

3.28ft connecting
cable supplied

This new drapery motor is available in both AC (WSCMQ) and DC (WSCMI) versions.

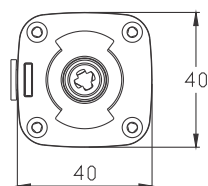

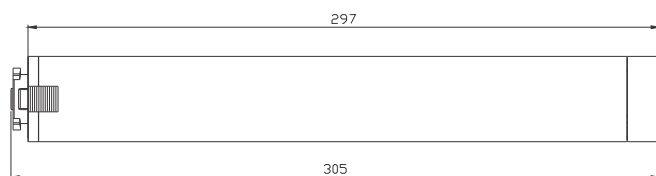

Although very similar, there are a few main differences between the AC and DC variants.

Both are remote control motors that are compatible with all Alpha controllers and our Neo App.

Dry contact control is also available on both for use with switches or relays. Both also can be started by hand, have auto limits setting, and have the same pulling capacity of 110lbs. Both also allow the drapery to be drawn by hand if power is disconnected.

The primary differences are as follows:

- Slightly slower run speed for the DC motor 5.9in/second vs 7in/second
- AC version comes with normal tail and molex connector
- DC version comes with a wall mount cradle for the battery pack and a removable battery for easier charging

DCB007

Rechargeable lithium battery
with internal 3 units lithium batteries
Maximum Output Power: 50W
Output Voltage: 11.1V/4.5A
Input Plug Size: 3.5mm x 1.35mm
Power: 27W/h
Nominal Capacity: 2200mAh
Lifetime: charge/discharge 300 times
Fully charged by power adapter (8 hours)
Working Temperature: -10°C-60°C
Protection Index: IP40
Dimensions: 1.05x0.9x10 inches

WSER50

universal

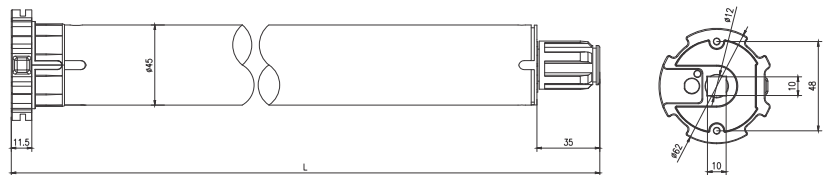

7 year replacement warranty
Electronic limit switch
Built-in receiver
Wireless limit setting
External antenna

The WSER50 series universal motors are a premium motor designed specifically for external straight drop products. Due to the torque stop function, this motor is ideal for all external drop screen systems. This protective feature can be used to stop on bottom bar impact bullets at the top limit in side channel systems and can also be used to tension the fabric when the shade is down. A top limit is set normally and the torque stop function can be used in conjunction. The **WSER50S** 10Nm/21rpm is a short motor version for smaller applications. It measures in a length of 20.375"

Electronic Limit Switch

OPTIONAL MODEL
The Alpha 6 wire model is both a remote control and dry contact control motor.

This allows for both full RF connectivity, as well as the ability to operate via hardwire control, thus allowing for integration into various control systems or a simple doorbell button.

WSER50

retractable awning motor

7 year replacement warranty
Electronic limit switch
Built-in receiver
Wireless limit setting
External antenna

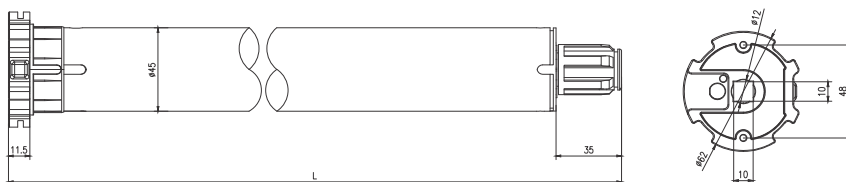

The WSER50 retractable awning motors are designed to automatically set their inner limit based on tension. It will also allow you to set the inner limit manually if you require.

When using the auto inner limit setting, the outer limit is set manually using the remote and it will find its own inner stopping position by detecting the resistance as it reaches the fully closed position the first time it is closed. After this the motor will stop in this position after detecting an increased resistance of 25% while moving.

On larger cassette awnings, 25% is sometimes not enough so you can increase this to 50%, 75% or 100% if required. It's rare to need this adjustment but it's a good feature to have.

When used with Sun/Wind sensors or Motion sensors, this motor detects a pulse from the sensor issued every 20 minutes. If the awning is out and does not receive a signal from the sensor for half an hour, it will close itself automatically as a protective measure assuming the sensor has failed or the batteries are flat.

Electronic Limit Switch Built-in Receiver Motor 45mm diameter

This motor's safety feature is the main reason you should always choose this motor for retractable awnings if a sensor is going to be used.

Models are also available in 6 wire for both radio and dry contact control.

WSER50 OD

obstacle detection motor with starhead

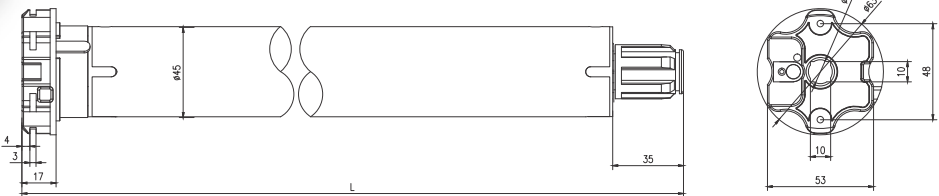

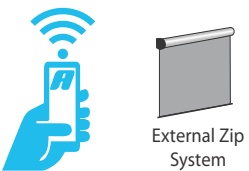

- 7 year replacement warranty
- Electronic limit switch
- Built-in receiver
- Wireless limit setting
- External antenna

Designed primarily with zip style systems in mind, this motor incorporates obstacle detection in both directions. It can stop on bottom bar impact bullets at the top limit if necessary on the way up, but also, if on the way down, the motor detects that the bottom bar has stopped moving in the channel due to getting stuck or hitting an object, it will rebound to a higher point and attempt to go down again. After attempting this 3 times unsuccessfully, if it has detected an obstacle, it will return to the rebound position and stop. But if it has detected wind stopping the awning, then it will return to the top limit. This motor has a star shaped head which is different to all other Alpha motor heads, and will suit many common mountings used by various manufacturers when producing their product.

WSER60 100/15

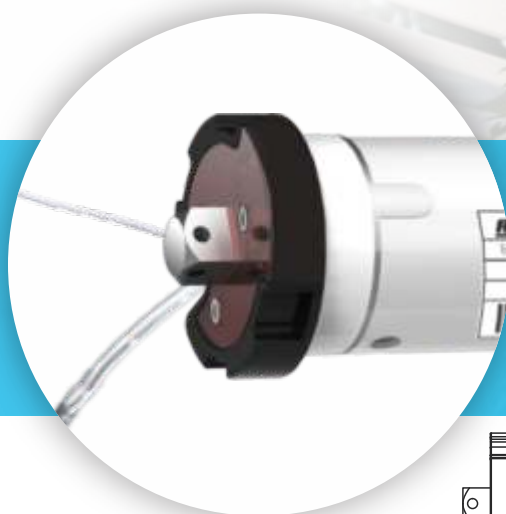

universal motor

7 year replacement warranty
Electronic limit switch
Built-in receiver
Wireless limit setting
External antenna

The WSER60 is the heavy duty motor within the WSER family.

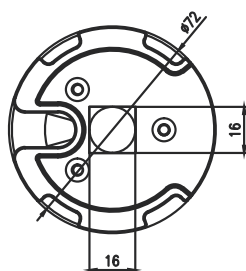

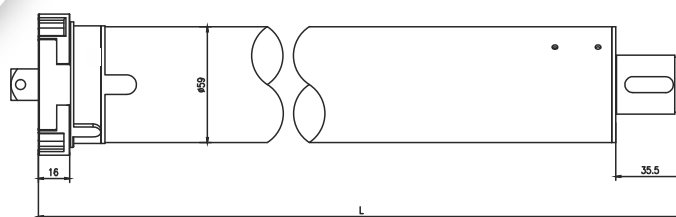

Although it's a universal motor, it's compatible with extra-large retractable awnings, including the additional safety features provided by motion and wind sensors.

Due to the larger diameter of this motor, the smallest tube it can be used with is a 78mm single keyway tube, or a 70mm octagonal roller shutter tube.

WSERD30B

rechargeable internal battery motor

DC 12V power supply
Built-in rechargeable Lithium battery
Electronic limit switch
Built-in receiver
3rd intermediate limit position

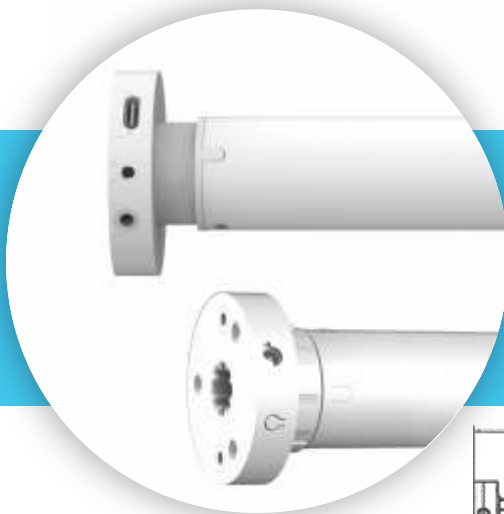

Available in three torque ratings, 1Nm, 2Nm, 3Nm, this version of our popular battery motor has a new ground-breaking coreless DC drive inside, that is much more efficient and much quieter than other battery motors.

The WSERD30B 1/30C (1Nm) version of this motor can lift a blind up to 6' x 6'. Under normal use, the battery will last up to 450 cycles between charges. This 1Nm motor has a USB-C charging port and uses an ALDC 5V-C charger.

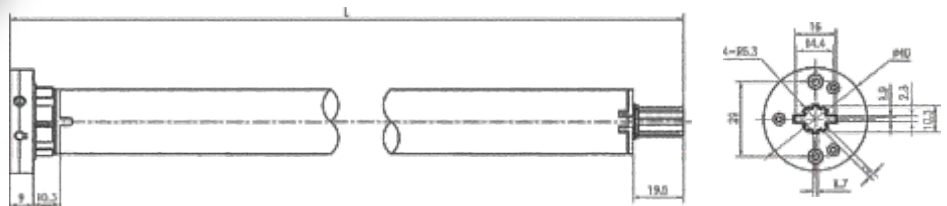

The WSERD30B 2/31 (2Nm) motor has internal lithium rechargeable batteries with approximately 12 months of an average use of 750 up/down cycles between charges. It can be used on blinds up to 10' x 10'.

The 3Nm version of this amazing motor will lift a blind 10' high x 15' wide and the time between charges will average 8 - 12 months under normal usage.

The fittings for these motors will allow it to be used with a range of tube sizes from 30-50mm in diameter. All of the charging intelligence is taken care of inside the motor, not by a 3rd party charger. This eliminates many of the issues experienced by other brands of DC motors. The motor will indicate both when charging is required, and completed. It cannot be overcharged and it will not start to discharge when the batteries are full as other brands may do. The charger plugs directly into the motor head so there is no need for an unsightly charging cable.

with USB-C charging port

The market talked and we listened! Alpha is proud to introduce an indoor **and** outdoor rated 5Nm rechargeable. It is suitable for certain external screens, yet retains a sleek mounting head for refined interior applications. It is the ideal solution for wide spanning shading systems that demand power and speed without the need for an electrician. Like all other Alpha radio products, it is compatible with all Alpha controls and integration devices.

Can be combined with TYB006 Solar Panel.

ALDC charger required

- * Charger comes with 13ft cable.
- * 10ft extension cable also available.
- * Motor comes with 20cm charging tail for optional use, in case the motor head is difficult to access after installation.

Alpha-Neo App & Link Box

ALPHA^{NEO}

App integration
made easy

Control4

SAVANT

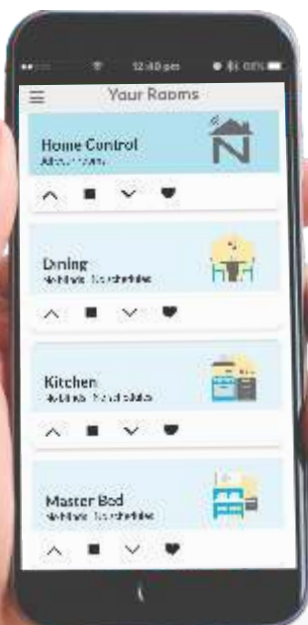

This app is extremely versatile and easy to set up. It controls motorized products individually, or by area, or the whole house at once from anywhere in the world with an internet connection. All functionality can be scheduled to operate automatically.

Simply purchase the link box and download the free app for either Android or Apple. This app is compatible with all Alpha remote control motors. There is no limit to the number of control devices you can connect. There are 30 control groups (rooms) available and you can add up to 8 blinds per group. Additionally, you can create up to 40 schedules to automate functionality.

Total Length (in)	2.95
Total Width (in)	2.36
Total Height (in)	0.98

Remote Controls

Pioneer series

Alpha's Pioneer series remote controls have a new sleeker look and wall holder design. The other big change is the addition of a battery cover, so there is no more need to un-screw the back to change the battery. Available in single or 4 channel versions without a screen, or 4, 8 or 16 channel versions with a screen, as well as single and 4 channel options with timers. Incorporating soft silicone rubber edges and buttons, this is a great remote for use with external products where being a bit more bounce proof is an advantage. All Alpha remotes and receivers are inter-compatible. Remotes now have an easy access battery compartment.

Single Channel

RE101

Specifications

Channels	1
Frequency (MHz)	433.92
Codes	Rolling
Wall Mount	Yes

4 Channel

RE102

Specifications

Channels	4
Frequency (MHz)	433.92
Codes	Rolling
Wall Mount	Yes

With the 4, 8 & 16 channel remotes you can control 4, 8 or 16 different motors or receivers separately or any group among them.

The 4T is a 4 channel variant which can set up 8 different open/close times and also select days of the week.

Remote Controls

Navigator series

The Navigator series has an elegant and simple design featuring stainless steel edge trim and a near invisible magnetic wall mount. The stainless finish is much more than simply a trim on the edge. It's actually a solid steel chassis to which the front and back panels are attached. This gives the remote a great deal of structural strength, but additionally adds a significant feel of weight and quality in the hand that customers often notice. Available in single and 5 channel without screens, and 4, 8 and 16 channel with screens as well as single and 4 channel options with timers.

Voltage	120V 60Hz

Wall mount receiver for high capacity motors with up to 1600 watts current draw. Suitable for all Alpha 4 core motors. Has the option of lighting control with up 500 watts output. Can be used with up to 15 remote controls.

RE-DCE

Relay controlled remote

**AUTOMATION
SYSTEM CONTROL
OF REMOTE
CONTROL
MOTORS**

This device is a single channel remote control that plugs into a power point for permanent power and is controlled by connecting the device to relays in a control system or other switches. There are 4 wires connected this item: common, up, stop, and down. When the common wire comes into contact with any of the control wires, the function for that wire will be sent out to any WSER series motors or remote receivers this device is assigned to.

This device allows remote control Alpha motors to be operated by a huge variety of building management systems, automation equipment, press buttons or key turn switches as well as a remote control. This device is not practical for use in setting up the motors it will control. This must be done with a standard remote and the RE-DCE can be assigned to the motor separately for additional control options.

When planning your job with this item, only allow for connection to relays or switches that make contact as long as a button or switch is pressed and release automatically afterwards. Do not use rotary switches or switches that lock into position as the item will continue to send out the signal for as long as contact is made. This could produce unwanted results.

RS005 Motion Sensor

for retractable awnings

Available in black or white

This item attaches to the front channel of a retractable awning at either end. It measures the angle of the front bar and the amount of movement created by wind. When the sensitivity setting is reached, it sends a signal to the awning to close.

When used with a retractable awning motor, it will send a pulse to the motor a few times an hour telling the motor it's there and working. If the motor stops detecting this pulse due to drained batteries or failure, it will automatically retract the awning after about half an hour to both protect the awning and to alert the owner that the motion sensor is not working. Once the pulse is restored (usually by installing new batteries) normal operation will resume.

Although this item will control a Universal motor, the Universal motor does not have the extra protective functions mentioned above if the item stops sending the pulse. The motion sensor is a more reliable method of protection than the Sun/Wind sensors as it responds to actual physical movement of the front bar and not the wind speed detected by a device mounted nearby.

This unit has 9 pre-determined sensitivity settings.

Cannot be used in conjunction with Sun/Wind Sensors.

WSB11

Limit Setting Device

Specifications

Limit Setting Device Programming Tool

This device is for setting the limits on WSEC series motors.

All buttons are spring loaded so use as a method of powering other motors temporarily while programming is impractical.

WSB12

Test Lead

Specifications

Test Lead

This item allows you run 4 core WSS series motors in either direction while you set limits.

Alternatively you can use it as a temporary means of powering up 3 core remote control motors while you set limits. Switch is locking so it does not need to be held down.

Retractable Awning Motor Guide

Currently Alpha's Retractable Awning Motor offerings are a 50Nm and 100Nm motor.

The RED 100Nm listings in the 70mm tube section below indicates that this motor is incompatible with a 70mm tube, due to its physical size.

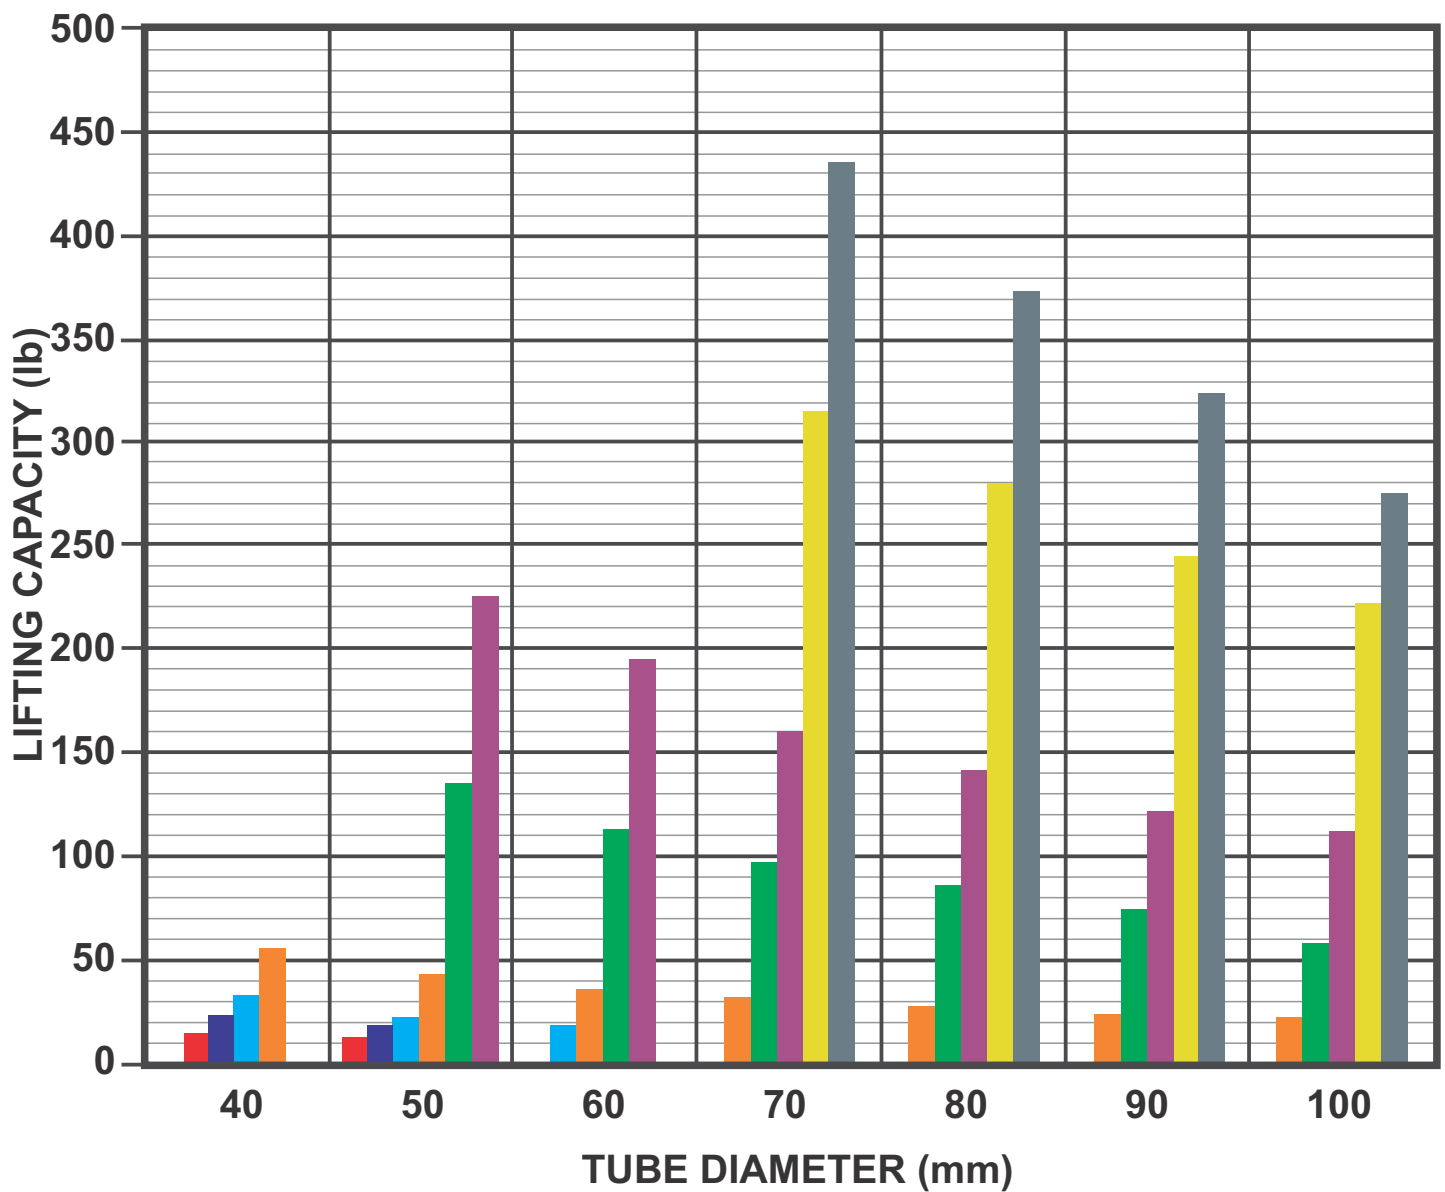

70MM TUBE
